**Dear Mr. Przybojewski,**

I enjoyed working with the CFX Team throughout the Newark Tire/Wheel Assembly Program your strong efforts on the program were greatly appreciated. I trust that CFX will continue to successfully launch new programs throughout North America.

**This Letter of Recommendation is for your reference and display**

**CFX's exemplary efforts and performance on the Newark Tire/Wheel Assembly Program:**

**CFX was awarded the Chrysler Aspen and Dodge Durango Tire/Wheel Assembly Program with a volume launch date of July 25, 2006.**

**CFX worked diligently to put in place a top notch facility with all of the necessary assembly and ancillary equipment**

This program included 100% Uniformity Measurement with Teardown and Rebuild of assemblies, as necessary.

The Uniformity Specifications for the Tire/Wheel assemblies were extremely challenging.

The Uniformity levels of the component tires and wheels were such that the Uniformity Fallout for the assemblies was inherently significant

**CFX did an excellent job in supporting Chrysler throughout this challenging program CFX demonstrated the technical expertise and sound employee training needed for this difficult program,**

**CFX's quality and delivery performance was outstanding throughout the program life. One of CFX's greatest strengths is their commitment to continuous improvement; they continually research and implement improvements.**

**CFX finished out the Newark Tire/Wheel Assy Program In a thorough and professional manner.**

**In Summary, CFX is a highly qualified company prepared to take on challenging programs with the discipline and determination to succeed.**

Sincerely,

Keith T. Kilmer

Sr. Buyer - Chrysler Purchasing
